Art Unit: 2627

1) The amendment filed 11/23/2006 is acknowledged. New claim 6 has been added.

## 2) Claims 1-6 are allowed.

The apparatus for detecting an external optical disk drive's open/closed status, comprising an upper housing a cover disposed above the upper housing wherein a convex portion is disposed at the front edge of cover with a hook hole therein, a solenoid valve subassembly, fixed under the bottom face of the upper housing, a solenoid valve base includes a body, a connection part disposed on a side of the body and a spring support disposed on the other side of the body, wherein a space is located between the connection part and the spring support, a solenoid valve fixed at the bottom of the solenoid valve base, a hook device engaged with the connection part of the solenoid valve base, a torsion spring, disposed at the spring support of the solenoid valve base, an elastic plate, disposed within the space of the solenoid valve base, a lower housing, with a motherboard disposed thereon, combined in assembly with the upper housing to contain and protect the motherboard and the solenoid sub-assembly therein, and two wires wherein one end of each wire is connected to the torsion spring and the elastic plate respectively and the other end is electrically connected to the

Art Unit: 2627

motherboard, wherein, when the cover is closed, the convex portion located at the front edge of the cover presses on the torsion spring, and the torsion spring contacts the elastic plate, resulting in an electrically conductive state, when the cover is opened, the torsion spring is released and the torsion spring disengages from the elastic plate disconnecting the circuit, as recited in the independent claims, are not found or suggested in the prior art of record.

- 3) The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 4) Any inquiry concerning this communication or earlier communications from the examiner should be directed to TAN XUAN DINH whose telephone number is (571)272-7586. The examiner can normally be reached on MONDAY to FRIDAY from 8:00AM to 5:30PM.

The FAX phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
